Acoustic Black box Answer Sheet[1]

A.1 (0.2 pt)

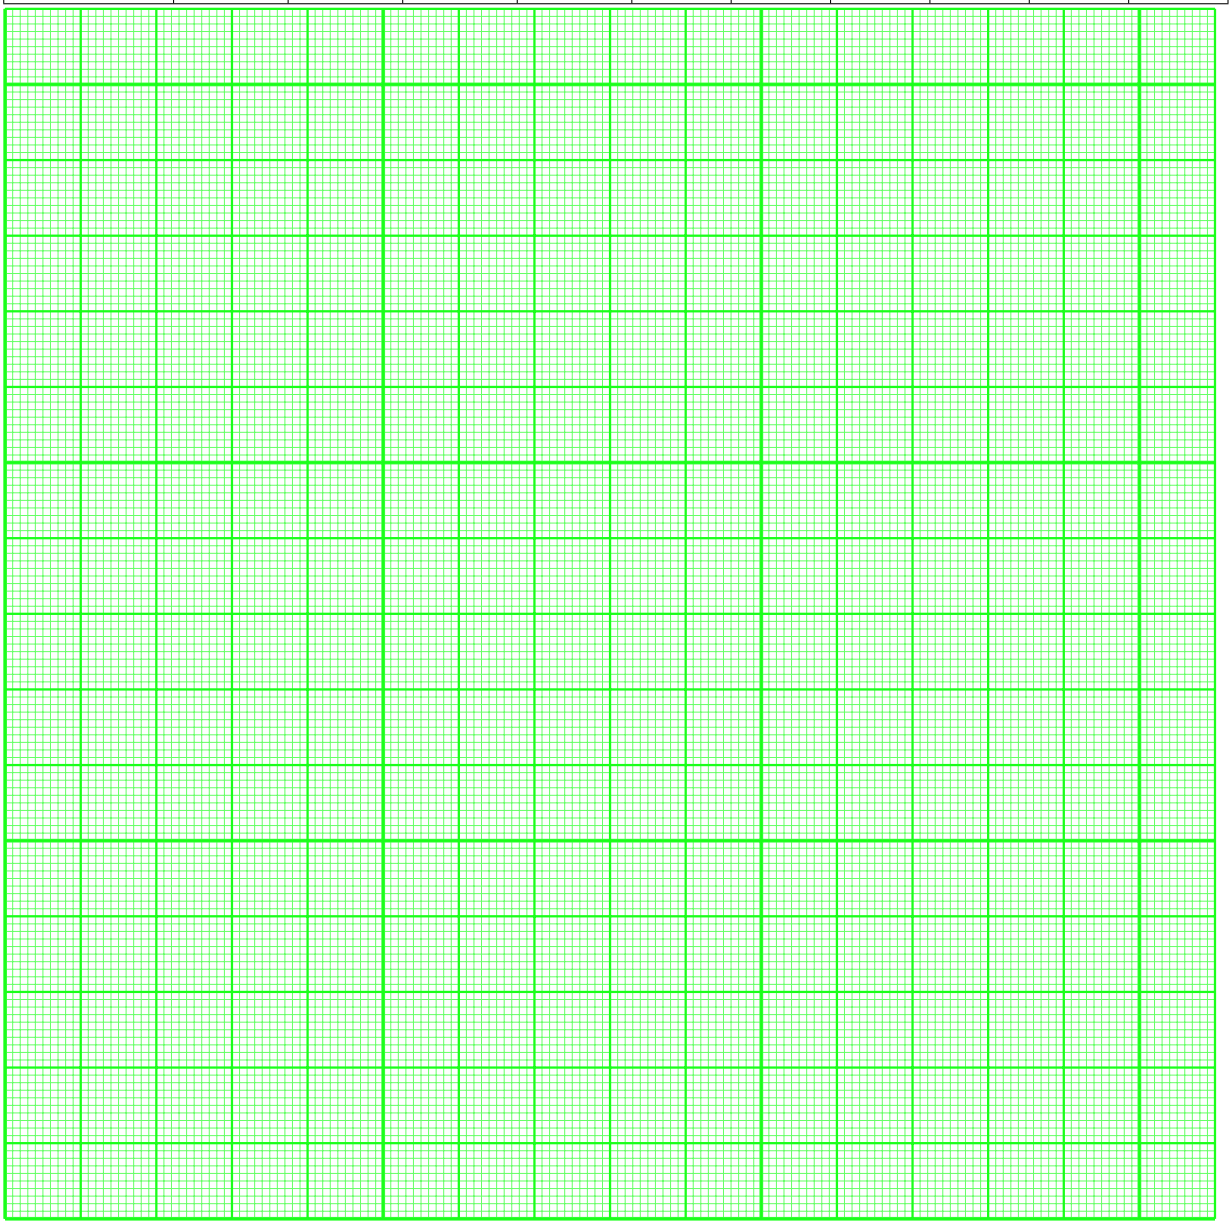

$x(t) =$

$y(t) =$

[1]Siddharth Tiwary (IIT Powai, Mumbai), Siddhant Mukherjee (The University of Cambridge, UK), Chandan Relekar (IISc, Bangalore), Charudutt Kadolkar (IIT Guwahati), Praveen Pathak (HBCSE-TIFR, Mumbai), were the principal authors of this problem. The contributions of the Academic Committee and the International Board are gratefully acknowledged.

A.2 (1.2 pt)

No.	1	2	3	4						
$t(s)$										
f (Hz)										

A.3 $(1.0\ \text{pt})$
Expression for minimum frequency:

A.4 $(1.4\ \text{pt})$
Source's initial coordinates:
(X_A, Y_A):

A.5 $(2.1\ \text{pt})$

f_0 (Hz)	$\omega\ (\text{rad}\,\text{s}^{-1})$	R (m)	v_S (m/s)

A.6 $(2.0\ \text{pt})$
β (in degrees) $=$

A.7 $(2.1\ \text{pt})$
Source's initial center coordinates:
(X_C, Y_C):

r_D	θ	v_d	γ	t_i	t_f	Δ	Equation/variable for which used
