Theory

ISPhO

A3-1

English

Hydraulic jump

Part A. Flow without energy loss

A.1

$E =$

A.2

$d_c =$

A.3

$v_c =$ $\mathrm{Fr}_c =$

A.4

Equation:

A.5

$\Delta v/v_1 =$ $\Delta d/d_1 =$

A.6

Velocity increases for:

Velocity decreases for:

Part B. Theory of hydraulic jumping

B.1

$F =$

B.2

Equation:

B.3

$d_2/d_1 =$

B.4

$\Delta E =$

B.5

A jump is possible for:

Part C. Hydraulic jump in the sink

C.1

(Formula) $v =$ (Value) $v =$

C.2

$d(r) =$

$d(r_c) =$

C.3

$\mathrm{Fr} =$ $d_2/d_1 =$
